

Expanding access to da Vinci surgery with a pay-per-use model

Accelerated MIS program (AMP)

What if your hospital could reach its full potential without significant upfront costs and have unfettered access to premium robotic system technology? Now you can. AMP by Intuitive is a pay-per-use, flexible acquisition model for hospitals and health systems with tightening capital budgets. It addresses access barriers and legacy investing habits—those individual, incremental purchases that bump your healthcare organization into expenditure ceilings and technology obsolescence that can limit growth.

With AMP, you can operationalize advanced technology and avoid capital outlay with the goal of enabling immediate growth and maximizing revenue.

AMP is a customizable approach for da Vinci® surgical systems that combines the system cost, service, and interest into a per-procedure operational fee.
